EXPERIENCE

Junior Software Developer — Astronics LSI

February 2024 – Present

Summary

My work involves leveraging a diverse tech stack, collaborating across departments, and maintaining high standards of code quality and documentation.

Key Responsibilities

- Enhanced and maintained user interfaces for electrical and optical test benches using mainly Python, LabVIEW and VBA.
- Developed applications on top of existing Python applications, utilizing libraries such as tkinter, PIL, numpy, pandas, and others to improve functionality and efficiency.

Technical Accomplishments

- **Canon Cameras Integration:** Implemented CCAPI to automate the process of capturing and storing images with Canon cameras, increasing operator efficiency and safety.
- **Automated UV Image Processing:** Created a tool to detect and highlight humisec within panels, reducing UV light exposure to operators and improving accuracy in error detection.

Tech Stack

- **Programming Languages and Tools:** Python, LabVIEW, VBA
- **Libraries and Frameworks:**
 - Python: tkinter, PIL, numpy, pandas, os, shutil, datetime, serial, time, keyboard, pyinstaller
 - OpenCV: SIFT detector, cv2 for image manipulation and filtering
- **Database Management:** SQL
- **Version Control:** GitLab
- **Integrated Development Environments:** VSCode (primary reason for the company's adoption and provided training to others)

Field Service Technician — Novatech Analytical Solutions

May 2020 – September 2022

- Automated manual tasks using PLC with Ladder logic and Arduino with C++ language.
- Calibrated and repaired analytical Gas instruments.
- Demonstrated excellent communication skills with clients in both English and French Languages.

PROJECTS

Social Media Platform for Dragon Boat Website — K-Sync

Comprehensive social media platform tailored for Dragon Boat enthusiasts, offering features for registration, team creation, and seamless communication.

Core Features

- **User Management:** Implemented registration and login functionalities, along with team creation.
- **Enhanced User Experience:** Integrated delays and confirmation messages to enhance the user experience.
- **Data Security:** Secured using BCrypt API for password encryption, ensuring account security.
- **Efficient Data Handling:** Optimized backend data to save space and improve performance.
- **Dynamic Team Creation:** Utilized drag-and-drop functionality for team creation, with special privileges for team creators.
- **Visual Appeal:** Designed a visually appealing front-end with fluid boat graphics.

Tech Stack

- **Backend:** JavaScript, NodeJS, ExpressJS, MongoDB
- **Frontend:** ReactJS, TailwindCSS, HTML, CSS, Redux
- **Deployment:** Render, Vercel

E-commerce Website — GADGETGO

GadgetGo Electronics' e-commerce website highlights an array of electronics products, emphasizing seamless browsing, purchasing, and advertising functionalities.

Core Features

- **Efficient Backend Management:** Leveraged GitHub for version control and conflict resolution, ensuring a smooth development process.
- **Robust Infrastructure:** Developed a solid backend infrastructure using technologies like JavaScript, NodeJS, ExpressJS, and MongoDB for optimal performance.
- **Elevated User Experience:** Streamlined product discovery with intuitive search functionalities and incorporated smooth add-to-cart functions for seamless shopping experiences.
- **Dynamic Advertisement Handling:** Created dynamic advertisement slides for improved marketing strategies.

Tech Stack

- **Backend:** JavaScript, NodeJS, ExpressJS, MongoDB
- **Frontend:** ReactJS, Redux, TailwindCSS
- **Deployment:** Render, Vercel

EDUCATION

Concordia University — Full-Stack Web Development Diploma

April 2023 – July 2023

Intensive bootcamp with Excellence mention, leader in group projects

Vanier College — Industrial Electronics Technologist (DEC)

July 2017 – February 2020

Recipient of CPMT scholarship, A+ overall

ADDITIONAL TECH EXPERTISE

- **Programming:** JavaScript, Java, C++
- **Web Development:** NodeJS, Express, ReactJS, Redux, AngularJS, HTML/CSS, JQuery, Insomnia
- **Database Management:** MySQL, MongoDB, Firebase
- **Version Manager:** npm / yarn
- **Version Control:** Git, Github, GitLab
